

# **Digital University**

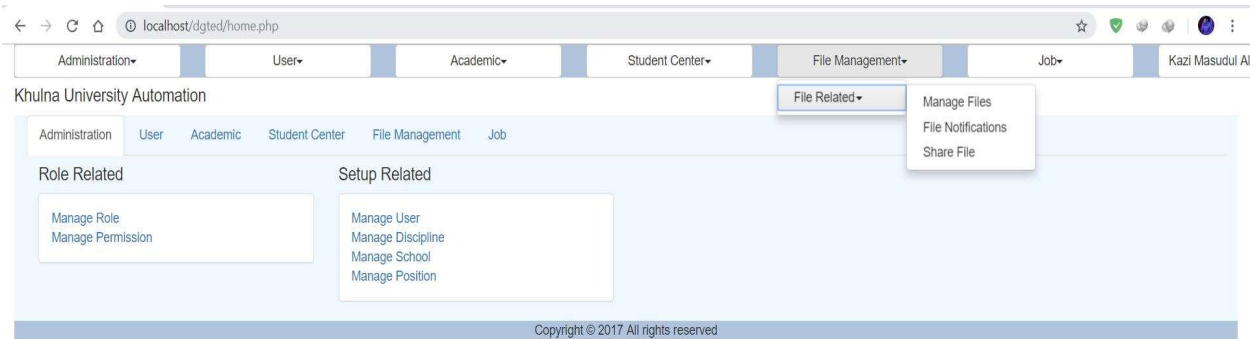

## **CSEKU\_WPL\_2018**

### **File Management System**

<b>General Overview.....</b>	<b>01</b>
<b>User interface.....</b>	<b>02</b>

**General Overview:** This software will be used for file sharing from person to person. User will be able to upload a file and send it to specific users. Receiver will be notified that he has received some new files. From that page he can be able to see the details of sender of that file as well as he will be able to download that file. There is another page named Manage File from that user will be shown which file has been sent to which user. From here user will also be able to delete his files. For sending file user will use Share file page. There they will select the specific receiver and his file to be sent.

**User interface:** From the top of the bar after selecting *File Management* There will be shown a drop down menu which contains the different pages of File management. There is Manage File, File Notification, Share File.

There is another module named *Share File*. In their user will have some field which describe the details of that file user is sending. User will select the respective receiver and the file. He can also be able to add any comment with that file and send it to respective user.

The screenshot shows a web browser window with the URL `localhost/cseku_wpl_18_file/file_share.php`. The page has a navigation bar with tabs: Administration, User, Academic, Student Center, File Management, and Job. The 'File Management' tab is active. The main content area is titled 'Khuina University Automation' and contains a form for sharing a file. The form has three fields: 'To' (a dropdown menu with 'Kashif Khan' selected), 'Link' (a 'Browse...' button and the text 'No file selected.'), and 'Comments' (a text area). A 'save' button is at the bottom of the form. The footer of the page says 'Copyright © 2017 All rights reserved'.

There is another module named *File manage* where user will see the file details that he has sent to others, he also be able to Delete that file by pressing Delete button. This page will show him the receiver details, sending time. There will also be a button to delete that file and download it also. There is also a button named history by pressing that history of that file will be shown.

Activate Windows  
Go to Settings to activate Windows.

There is also a module named *File notification* which will notify the user if he receives any new file. Here he will be shown the time of receiving the file and other details like who has sent that file by pressing the button details. Here is also the option to see the file history and download that file.
